By Vending Concepts

KEY FEATURES

- ▶ Zero Shrinkage
- ▶ Eliminates Theft
- ▶ Secure Access
- ▶ Low Operating Cost
- ▶ AI Vision Technology
- ▶ Fast Seamless Transactions
- ▶ VMS Backend Management Software

HOW IT WORKS

SCAN

Swipe your credit card or scan the QR code with your mobile phone.

PAY

Select payment method on your phone and wait for the door to unlock. Or use the optional Pax Credit Card Reader

SHOP

Take what you need. Close the door and enjoy! The payment is triggered automatically by item(s) taken. Returned items won't be charged.

THE SMARTSHOP EXPERIENCE

THE SECURITY OF A VENDING MACHINE, COMBINED WITH THE PRODUCT VARIETY OF A MICRO MARKET.

The SmartShop delivers a cutting-edge, AI-driven retail experience, allowing customers to walk in, select their items, and check out seamlessly with no lines or cashiers. Powered by **Vision Technology**, the system uses AI and camera technology for autonomous checkout and secure, **controlled access**, ensuring the door only unlocks once a valid payment is made. Fully integrated with a **VMS system** for efficient operations, the SmartShop also offers **cost savings** by eliminating the need for card readers, reducing both upfront costs and transaction fees with its QR scan-and-go feature.

EFFORTLESS PAYMENT & SELECTION

Once inside, customers can choose from a wide selection of products, from snacks to beverages, with the convenience of a completely touchless process. After presenting the payment method, simply grab the item(s) or return them for no charge. The system takes care of the rest.

SMART TECHNOLOGY AT WORK

The **SMARTSHOP** uses advanced camera vision and AI technology to track the items selected by each customer. The system automatically detects what's been taken, charges the customer's card, and ensures a smooth, error-free transaction—all without the need for manual input. It's the future of retail, right at your fingertips.
