FLEXIBLE OPTIONS

The **VC 7206-5C Slim-Max** combination vending machine offers an efficient solution with a compact footprint of less than 9 square feet and a width of under 29 inches. Featuring six customizable shelves and a fully refrigerated cabinet, this machine is designed to maximize revenue per square inch, outperforming other vending options on the market. It's versatile design accommodates a wide range of products, making it ideal for locations such as laundromats, hospitals, hotels, schools, offices, airports and transportation hubs.

DESCRIPTION

The **VC 7206-5C** Slim-Max Combo Machine comes factory-equipped with advanced backend management software, allowing you to track sales and inventory, generate reports, and receive alerts in the event of a malfunction. This machine is fully compatible with a wide range of modern payment platforms, including Grab Pay, Touch N Go, Boost, Maybank, QQR, Paywave, Payrange, Google Pay, Apple Pay, and more.

Designed with cutting-edge technology, the machine features a double-layered glass merchandising door that is electrically heated to prevent fogging and eliminate condensation. Its explosion-resistant and smash-resistant body can withstand up to one ton of external force, ensuring durability and security. The VC 7206-5C Slim-Max Combo Machine is highly customizable, with adjustable shelves that can be resized and up to 36 selections available (customization fees may apply). It is capable of vending drinks, snacks, and food, and includes a specialized refrigeration system that both cools and heats, with a temperature range from 39°F to 77°F.

The machine's configuration can also be adapted to include either traditional spirals or an optional conveyor system (additional costs apply) to accommodate irregularly sized products, offering exceptional flexibility. Additional features include a secure, lockable cash box, a guaranteed vend system that ensures payment is held until the product is dispensed, and energy-efficient LED lighting.
